

Leading Education, Achieving a Difference

IN the LEAD is a free 8-week series of professional learning opportunities for educational leaders in Indiana.

Organized into 6 key strands, district teams identify and attend workshops in the high-priority topics that are essential to their needs.

Each strand is a collaborative of national thought leaders and the Educational Service Centers of Indiana to provide global thinking, local conversation & professional support.

As an attendee at IN the LEAD, district/ school leaders will engage with:

- **Prominent national thought leaders** in each Strand
- **In-Person 2-day workshops** with virtual or self-paced follow ups
- **Communities of practice** for on-going support & collaboration
